

Accounting Automation

Make your corporate card your customers' favourite way to make payments

Win more customers by automating more of their financial processes. We take care of the accounting know-how so you can focus on what you do best.

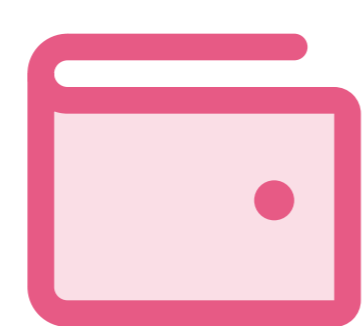

Corporate customers expect accounting automation.

Providers are competing to become the default choice for customers' making business payments. But customers have complex processes that intersect different platforms, each presenting unique challenges. Without the right insight, providers struggle to give customers the features they want.

Ship features faster

Codat makes it easy to ship accounting automation features, without having to be an accounting expert. Our solutions handle accounting complexities with built-in logic and data filtering, saving you time and resources.

Grow share of wallet

Become the default payment platform for your target customers. Eliminate double data entry between systems and make it easier for them to make payments through your platform.

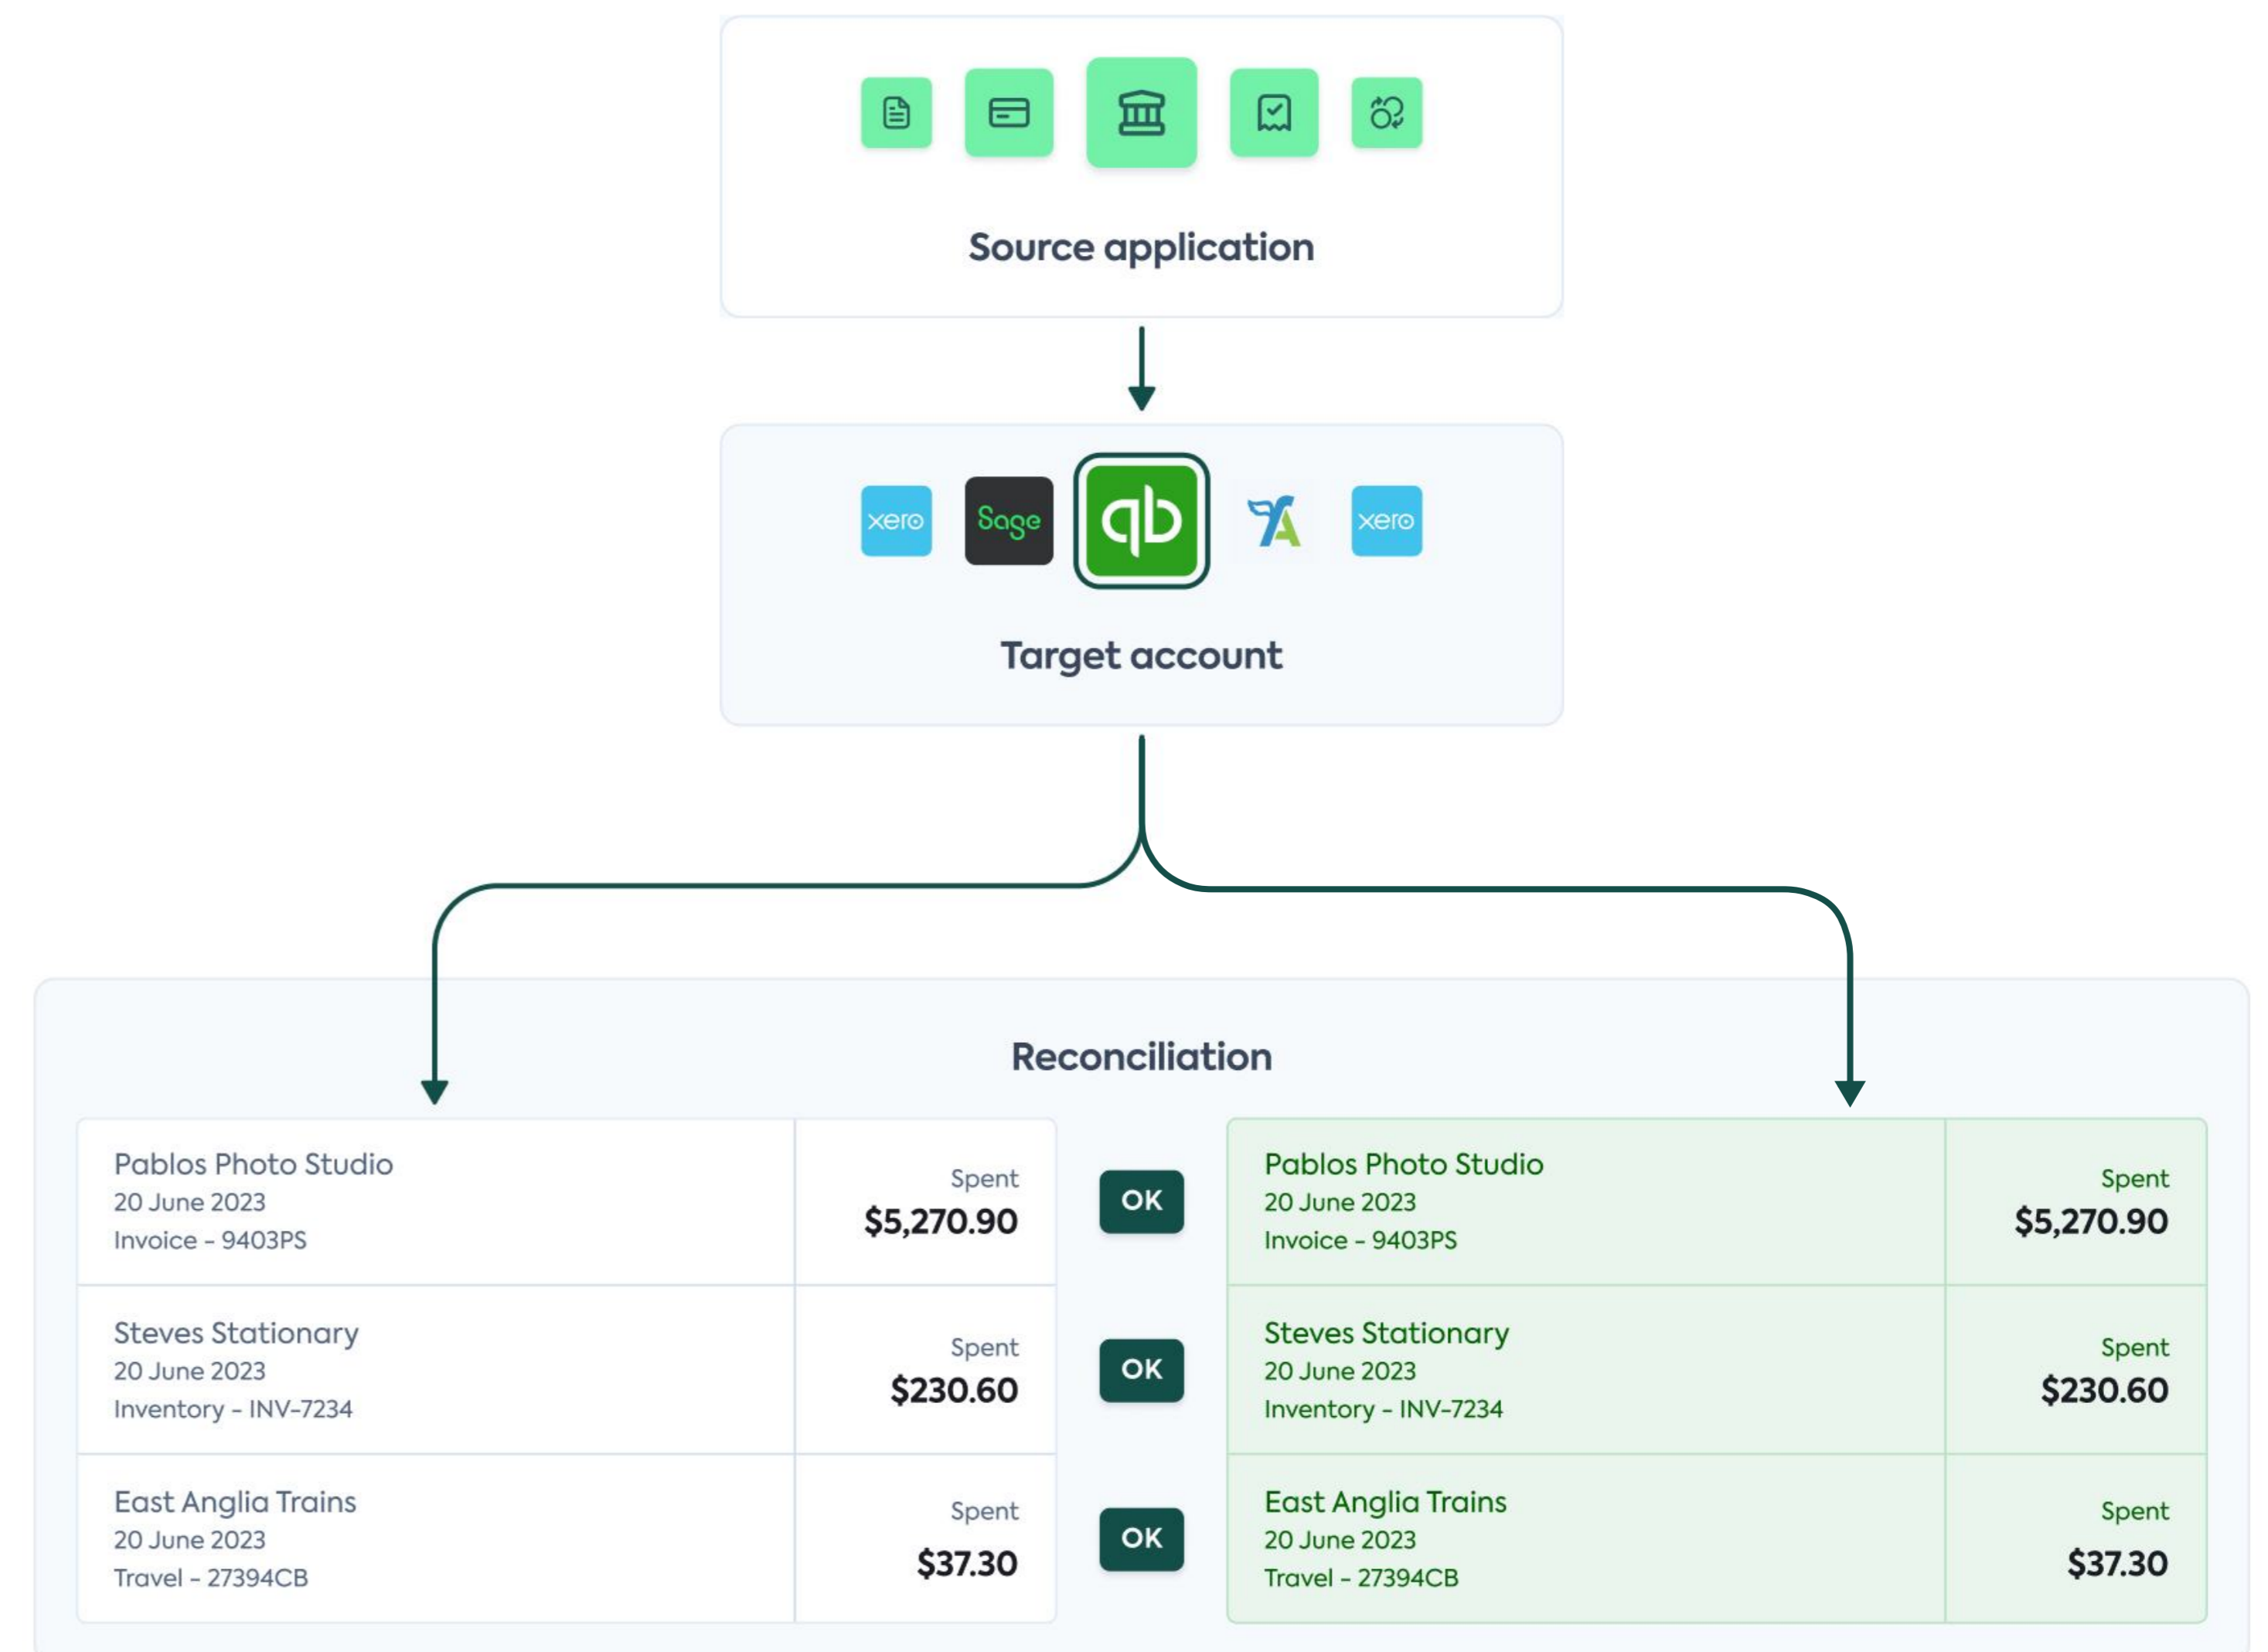

Increase competitive win rate

Win more deals with high-quality integrations. Codat's Accounting Automation supports a standardized data model, making it easier to build multiple integrations and capture more customers.

BANK FEEDS

Stream bank feeds to accounting software

Build bank feeds that look and feel like a natural part of the accounting software your customers use. No confusing set-up steps, just push a live feed of card transactions to make managing and reconciling spend easier for finance teams.

BILL PAY

Support your customers' essential bill pay workflows

Fetch unpaid bills from connected ERP and accounting platforms and sync payments ready for reconciliation without your customers lifting a finger. Our mapping endpoints ensure only the necessary data for your use case is synced, saving you time and resources.

EXPENSES

Standardized model for pushing expenses to accounting

Sync expense transactions, receipts and other attachments with accounting software in a simple, standard manner. We handle the logic for multiple currencies, tax, transfers and reimbursements, so you don't have to.

OUR INTEGRATIONS

We bring all the leading accounting and ERP platforms under a standardized data model, so that you can ship accounting automation features that work for all of your customers.
